INDEPENDENT PROJECTS

- **TinyCal**   (http://t.cn/RqoWpRJ)

TinyCal is a popular calendar on iOS/macOS. As a paid app, it now has gained **50,000 downloads** and has been featured by App Store for dozens of times, and was listed among **Top 10** in the productivity category for nearly one year continuously. Hence, I was invited to Apple Store's sharing activities.

- **Pin**   (http://t.cn/RyHnF4f)

Pin is a popular clipboard app on iOS/macOS platform with **290,000 downloads** and has been ranked as popular App for many times. Pin has also been recommended by many domestic media devoted to app recommendation and is highly recognized by the whole industry.

- **xTextHandler**   (http://t.cn/R50jcyn)

xTextHandler is one of the first Xcode Editor Extensions. It can provide several frequently-used text editing extensions for Xcode, such as Base 64 encoding and JSON formatting. It is completely written in Swift 3 and attracts attention since open sourced. It has been listed on **GitHub Trending twice** and Swift Trending for many times with the largest number of stars (**1100+ stars**) compared with similar items.
